

St. Margaret's School

Belong. Believe. Become.

TECHNOLOGY SPECIFICATIONS AT ST. MARGARET'S SCHOOL 20__ – 20__

Technology is an integral part of the St. Margaret's School program. Our goal is to provide comprehensive instruction and access to information and communication to all members of our community. Our campus is wired to provide access to our computer network and Internet from all buildings. The library's holdings are also fully computerized, allowing searches and research to take place from numerous campus locations.

E-MAIL

The school has a Google apps domain, smsapps.org, that provides a variety of services including e-mail. Access information will be provided during orientation. Your e-mail address will be your first initial plus your last name.

Example: Mary Robinson: mrobinson@smsapps.org

INTERNET

Whenever Internet use is required, instruction will be given. Students have filtered Internet available in dorm rooms through our LAN.

ACCESS

We have campus computers and printers available to students during the day and evening, as well as on weekends. They are located in the Viola Woolfolk Center, the Cottage, various classrooms, and student dormitories. There are additional outlets for connection to the network throughout the campus. Every dorm room has network outlets. Wi-Fi is available in each of the campus buildings.

MINIMUM SPECIFICATIONS

Students must bring a device that meets or exceeds the following minimum specifications in order to efficiently complete the widest variety of school assignments, as well as to fully utilize features of Google Apps. Other devices such as iPads, Kindles, and tablets smaller than 11" may be useful, and may be desired for some tasks or courses, but they are no substitute for the minimum requirements, as they may not be able to accomplish certain tasks for all academic courses.

*International students please note: *St. Margaret's will not maintain or troubleshoot foreign language versions.*
